

### Educating in the Community

The Feminist Women's Health Center serves approximately 10,000 women each year through a wide-range of clinical services - and thousands more women, men, and girls through our outreach, advocacy, and educational programs. These include presentations, conferences, workshops and these Center programs:

- Young Women's Leadership Project
- The Chrysalis Project
- Refugee Women's Health Project
- Men Against Sexism Outreach Project

## ALL CHOICES FOR ALL WOMEN

Since 1977, the Feminist Women's Health Center has strived to meet our mission to empower women through service, education and advocacy. As Atlanta's leading non-profit feminist women's healthcare resource, we have earned an outstanding reputation for providing quality care and community education, while working unceasingly to improve women's health. Through our three programs, *Cliff Valley Clinic*, *Division of Reproductive Medicine*, and *Community Education & Advocacy Network*, the Feminist Women's Health Center offers a wide range of services, programs and education for the community we serve.

### Leading the Way in Women's Health Care

#### Cliff Valley Clinic

The Feminist Women's Health Center welcomes women of all races, ethnicities, sexual orientations, socio-economic status, and ability. On a typical day, four languages are spoken, and additional translators can be arranged, as needed.

#### GYN & Wellness Services

The Feminist Center offers affordable and supportive comprehensive gynecological health care including GYN Exams, STD testing and treatment, pregnancy testing, family planning and menopause checks. We understand that a woman's health care needs change and vary throughout her life. Thus, we offer an *It's Your Choice* annual exam, in which women have the freedom to individualize their health care by choosing the particular GYN and wellness services that suit her needs. As part of these

services, we celebrate transitions in women's lives through our *Center of Life* services with individualized mid-life services.

#### Abortion Care

Our licensed physicians perform all abortions, medical and surgical, while our trained and caring advocates support each woman throughout the process. Each woman receives personal counseling and, should she choose to not have an abortion, referrals for other options and care.

#### Division of Reproductive Medicine Donor Insemination (also known as Artificial Insemination)

The Feminist Center's comprehensive fertility program offers a means of achieving pregnancy for many couples having difficulty conceiving, and is open to all women including single women and lesbians. Our fully integrated program includes pre-pregnancy counseling, legal referrals, on-going treatment by a licensed gynecologist, and safe, effective insemination procedures.

#### A New Home

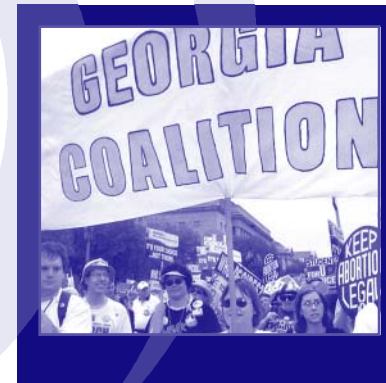

The new Cliff Valley Clinic and Division of Reproductive Medicine offer expanded operating, exam, and counseling rooms. We have ample, secure parking and convenient access to MARTA.

### Advocating Reproductive Health & Justice

#### Political Advocacy

The Feminist Center employs a professional political advocate during the state legislative session to represent us on a full range of women's health issues. Through participation with national coalition efforts, the Feminist Center also plays a role in national issues.

#### Citizen Advocates & Activist Trainings

Volunteers and grassroots lobbying strategies back our professional advocacy efforts. Advocates are also trained in grassroots organizing, and women's health issues through workshops such as *Focus on Feminist*, *Voice for Choice I & II*, *Citizen Lobbyist*, as well as fundraising.

#### Coalitions and Partnerships

We partner with numerous organizations to extend our services and community outreach to underserved women and girls. We were leaders in the Georgia Coalition for the 2004 March for Women's Lives, one of the most significant displays of local, state and national support for reproductive health and justice.
